

A Powerful Partnership

Collaborating to empower creativity
by protecting creators rights.

Welcome
to the future of
Digital Asset Protection.

We are **CopyrightsWorld**

A platform that allows creators to protect the copyright of their intellectual property and monitor how it is used across the web.

**We use 21st century tech to make
copyright protection accessible to everyone.**

We are **CopyrightsWorld**

We use blockchain and AI technologies to

- ★ provide you with the **highest level of security** to **protect your most valuable digital assets**
- ★ as well as file sharing and a **safe** environment to work with your **website** content, **social media** content, **photographs**, owned **video**, **e-books**, **courses**, **graphics**, **illustrations**, **music**, sound, **poems**, **blog posts**, even **computer programs** and **databases**.

We believe that everyone is a creator.

You are a creator even if you don't know it.

It doesn't matter what profession you are in or how much experience you have - every time you take a **photo**, every **tweet** you post, every **blog** you upload, every meal you make, every conversation you have are **forms of self-expression** and that expression is the purest form of **creation**.

The New Digital Era

Ten years ago being a **creator** and running an online business was quite different than today. In a short space of time, expensive, bureaucratic and time consuming tasks have been transformed into affordable, and often free, services that can be accessed with the click of a mouse.

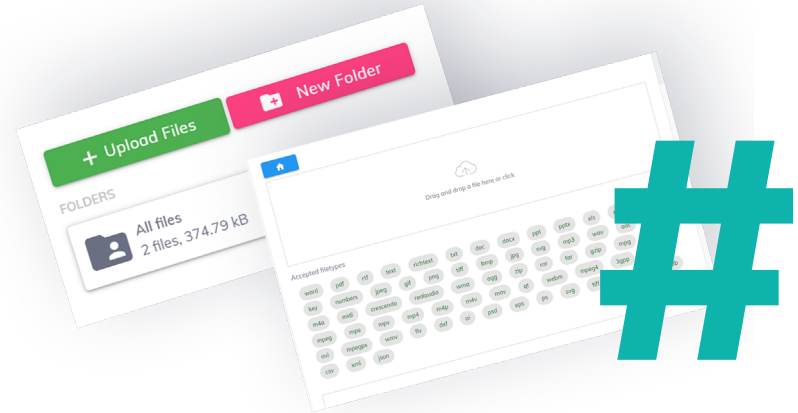

What we do

We are creating an ecosystem of partners and affiliates who feel as strongly as we do about protecting the intrinsic rights of creators.

Using 21st century tech
we make copyright protection
as easy as an **upload** or a **hashtag**.

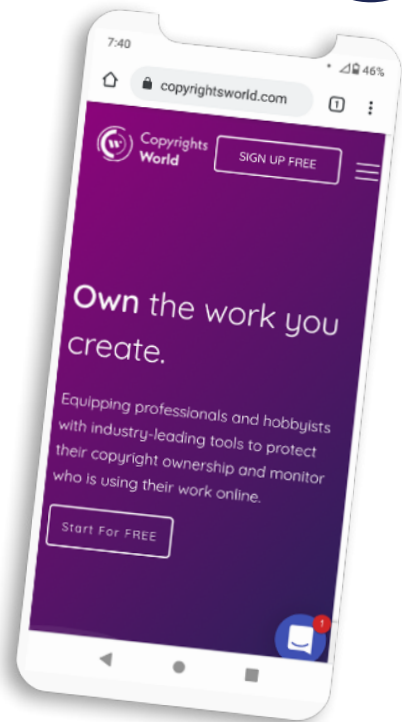

What we do

We empower creators to equip themselves for this new digital era by **streamlining** and **automating** the copyright protection process.

No lawyers.

No bureaucracy.

Copyright protection is now as simple as something you can do on your phone.

How we do it

Digital asset protection has never been as easy or as a simple

...**File Upload** Upload your file from your computer or your phone

...**Hashtag** Add #cwprotect when you share your original posts on social media

...**Blog Integration** Link your **blog** to your CopyrightsWorld account

We want to partner with
you

because we believe

together we are stronger.

We're building a network of outstanding industry allies to
impact & empower creators by equipping them for the future.

What we offer our **trusted partners**
